

Ingredients:

Behentrimonium Methosulfate, Cetearyl Alcohol, Panthenol (Pro-vitamin B5), Vitamin E, Theobroma Cacao (Cocoa) Seed Butter, Cocos Nucifera (Coconut) Oil, Parfum, Mica

Conditioner bar directions:

Just like the shampoo bar, if you are a conditioner bar virgin, then the first use will leave you feeling a little confused. Again, stick with us and it will change your life.

Wet the bar and smooth onto the ends in a downward motion. It will not feel like a liquid conditioner.. so don't freak out that your hair isn't instantly silky.

Comb through the hair. (If you have one of those hideous plastic brushes that rhymes with geezer, use this until you die, recycle it, give it to a mate, anything! If you don't have one of these, do NOT buy one - use a normal comb to comb through to the ends). Rinse and continue to brush through. For an extra shine boost, run the water cold and brave a dunk under the shower to seal the cuticles.

Storage:

It sounds strange, but whilst not using, please keep the bar AWAY from water! We keep ours on a little shower tray out of reach of the sprays. However, if you have a smaller shower or plan to store it in a place that's tricky to keep from getting wet, you can use a tin to keep the bar dry in between uses. Leaving the bar in a wet or humid environment (like a shower!) will affect the lifespan of the bar.
