

LUMINOSITY GLITTER ALLERGEN INFORMATION

Bioglitter™ biodegrades in a natural environment such as field of stream (where microbes are present). They consume the Bioglitter™, turning into harmless substances; biomass, water and carbon dioxide. Bioglitter™ is proven to biodegrade in a natural environment in a matter of weeks.

All of our glitter is:

- Cosmetic grade glitter; suitable for your beautiful face, body, hair, nails and even crafting.
- Suitable for children over the ages of 3.
- Cruelty-free; never tested on animals or unicorns.
- Free of the 14 common food allergens.
- The 14 allergens are: celery, cereals containing gluten (such as wheat, barley and oats), crustaceans (such as prawns, crabs and lobsters), eggs, fish, lupin, milk, molluscs (such as mussels and oysters), mustard, peanuts, sesame, soybeans, sulphur dioxide and sulphites (if the sulphur dioxide and sulphites are at a concentration of more than ten parts per million) and tree nuts (such as almonds, hazelnuts, walnuts, brazil nuts, cashews, pecans, pistachios and macadamia nuts).

Just like with face paints, stronger shades of Bioglitter such as blue and green can leave a light temporary colour transfer on the skin. If this occurs you can easily remove it with an oil-based makeup remover or mild soap and water.
