

To whom it may concern,

All of our Dram Team tasting sets contain samples of whisky.

The ingredients of the majority of whiskies are only:

- Barley
- Water
- Yeast

Certain types of whiskies use grains other than barley, such as corn, rye or wheat.

While whiskies are made using cereals, which contain gluten, the distillation process renders the product gluten free by international food safety standards.

Therefore, our whisky tasting sets can be enjoyed by anyone with allergies, even those on a gluten free or coeliac diet.

Best regards,
